

Pesticide-Free

gardengreen

LocalMotionGreen
www.localmotiongreen.org

Objective

Significantly increase the use of pesticide-free gardening practices in Grosse Pointe with the goal of a community that uses no pesticides in gardening.

Message

- Pesticides can be harmful to the health of people, pets, and the environment.
- Healthier, nontoxic alternatives exist.
- Gardens can be beautiful without using pesticides.

Participants

Reaching out to all community members – individuals, businesses, organizations, young and old for support through volunteering and funding.

Activities

- Educational programs on gardening without pesticides.
- Resource guides and a support network to encourage least toxic product purchase choices and pesticide-free gardening practices.
- Volunteer opportunities to support gardening without pesticides such as organizing a walk of local gardens maintained without pesticides, researching the current state of pesticide use by our institutions (municipalities, schools, churches, etc.), creating a local map of pesticide-free green spaces, meeting with interested neighbors to promote no use of pesticides, and more....
