

Green Cleaning Party Workshop at 11 am

Save money & Be Green

Learn how to make household cleaners from simple ingredients

Take home products from party workshop

Many household cleaners contain toxic chemicals linked to asthma and reproductive harm. But you can wipe out unsafe chemicals by mixing your own cleaning products.

A green cleaning party is a fun event where you and your friends learn how to make non-toxic cleaners from common ingredients like vinegar, baking soda, and castile soap. We supply the ingredients, containers, and give a demonstration and instruction. You learn by doing and take home recipes, products, and more knowledge of the benefits of a nontoxic approach.
